STEPS

1. **PREPARE:** Always work in a well-ventilated area. Clean all surfaces thoroughly with glass cleaner and a lint-free cloth. Mask off the outside and/or front of your glass piece with painter's tape and paper.
2. **PAINT:** With this product, painting the back or inside of your object will create a mirror on the opposite side. You will spray the inside of your vase to give the exterior a mirror finish. Apply 3-4 thin, light coats a few minutes apart to build the finish. Ensure each coat is fully dry before applying your next coat.
3. **FINISH:** Allow your paint to dry for approximately 12 hours. You can also add an optional top coat of Painter's Touch Ultra Cover Flat Black or Matte Clear for added durability.

Always thoroughly review directions on the package before using any product.
